INDUSTRY  
EXPERIENCE

**Amazon**

Supply Chain Optimization Technologies, New York City, NY  
*Research Scientist II Intern*

May 2021 – Aug 2021

- I built statistical models and conducted data analysis to analyze the impacts of delivery speed on demand. I provided counterfactual prediction that supported the inventory planning and control team in selecting the most desired products into the faster delivery program.
- I coauthored a technical report, and the report was accepted to the causal inference workshop of Amazon's annual machine learning conference.

*Research Scientist I Intern*

May 2020 – Aug 2020

- I worked as part of the demand forecasting team to provide reliable demand prediction to guide downstream decision-making amid the challenges of oscillating demand and unstable supply during COVID-19.
- I developed a demand forecasting methodology with features of fine granularity in time and space. My prototyped model was continued by the team for production in the whole US marketplace after my internship.

**Alibaba Group**

Data Science Decision Support, Sunnyvale, CA  
*Student Research Intern*

May 2019 – Aug 2019

- I worked in the decision support team of Alibaba Cloud, a cloud computing company and a subsidiary of Alibaba Group. I studied and proposed time series forecasting methods for cloud computing demand.

OTHER  
EXPERIENCE

**University of California, Los Angeles**

Department of Statistics  
*Research Assistant*

June 2016 – Sept 2016

Mentors: Prof. Ying Nian Wu and Dr. Jianwen Xie

SERVICES &  
ACTIVITIES

Reviewer for *Annals of Statistics*

Session chair, INFORMS Annual Meeting 2022

- General session: Learning and Optimization in Pricing
