	<i>Research Scientist II Intern</i>	May 2021 – Aug 2021
	<ul style="list-style-type: none"> ◦ I built statistical models and conducted data analysis to analyze the impacts of delivery speed on demand. I provided counterfactual prediction that supported the inventory planning and control team in selecting the most desired products into the faster delivery program. ◦ I coauthored a technical report, and the report was accepted to the causal inference workshop of Amazon's annual machine learning conference. 	
	<i>Research Scientist I Intern</i>	May 2020 – Aug 2020
	<ul style="list-style-type: none"> ◦ I worked as part of the demand forecasting team to provide reliable demand prediction to guide downstream decision-making amid the challenges of oscillating demand and unstable supply during COVID-19. ◦ I developed a demand forecasting methodology with features of fine granularity in time and space. My prototyped model was continued by the team for production in the whole US marketplace after my internship.
