INDUSTRY
EXPERIENCE

Amazon
Supply Chain Optimization Technologies, New York City, NY
Research Scientist II Intern   May 2021 – Aug 2021

- I built statistical models and conducted data analysis to analyze the impacts of delivery speed on demand. I provided counterfactual prediction that supported the inventory planning and control team in selecting the most desired products into the faster delivery program.
- I coauthored a technical report, and the report was accepted for poster presentation at the causal inference workshop of Amazon's annual machine learning conference.

Research Scientist I Intern   May 2020 – Aug 2020

- I worked as part of the demand forecasting team to provide reliable demand prediction to guide downstream decision-making amid the challenges of oscillating demand and unstable supply during COVID-19.
- I developed a demand forecasting methodology with features of fine granularity in time and space. My prototyped model was continued by the team for production in the whole US marketplace after my internship.

Alibaba Group
Data Science Decision Support, Sunnyvale, CA
Student Research Intern   May 2019 – Aug 2019

- I worked in the decision support team of Alibaba Cloud, a cloud computing company and a subsidiary of Alibaba Group. I studied and proposed time series forecasting methods for cloud computing demand.

OTHER
EXPERIENCE

University of California, Los Angeles
Department of Statistics
Research Assistant   June 2016 – Sept 2016
Mentors: Prof. Ying Nian Wu and Dr. Jianwen Xie

- I studied statistics and machine learning tools for signal modeling and image synthesis. I was fully supported by a UCLA-CSST scholarship and a USTC scholarship for study abroad.
